

# Take Your IT Risk Management Program to the Next Level

Get actionable insights on your cyber and IT risk landscape and swiftly prevent and mitigate risk across your organization with Diligent's IT Risk Management (ITRM) solution, powered by HighBond.

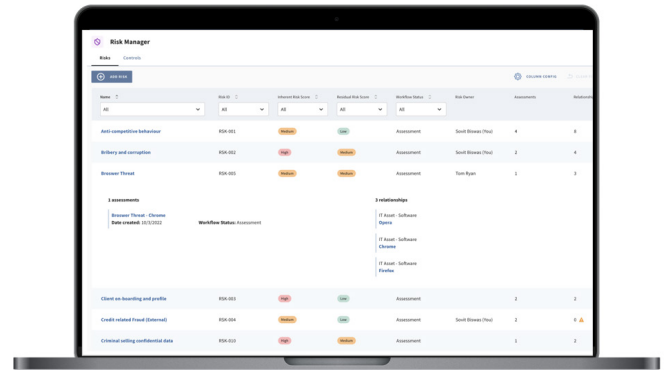

Cyberattacks are growing exponentially in frequency and sophistication, with the average total cost of a data breach being \$4.35 million USD. The siloed nature of organizations' wide array of IT assets and applications often results in lack of real-time visibility into threats and vulnerabilities, increasing their exposure to risk.

## Experience the Clarity of a Single View of Risk

Proactively prevent, identify, and remediate risk across your organization's IT and information assets, delivering instant visibility into your threat landscape. Protect your organization by making revenue-driven decisions informed by advanced analytics.

Enable all teams to work centrally across a single system, with unified data and streamlined collaboration to inform executive decision-making. Save time and identify security threats faster with automated IT risk workflows.

Deploy pre-configured content in a few clicks to help you manage an inventory of risks and controls, with qualitative IT risk scoring.

## How the Diligent IT Risk Management Solution Does Risk Differently

Most organizations struggle to build strategic alignment around their cyber and IT risk landscape because each department has different goals and priorities. IT Risk Management brings all your data together in one place, to drive consistency and visibility across the entire organization, and to facilitate better collaboration and access to real-time insights into risk.

### Use IT Risk Management To:

- Equip the board and C-suite with visualizations and executive dashboards to make data-driven, risk-informed decisions
- Collaborate seamlessly across teams to identify and assess your IT risk through a centralized dashboard
- Automate and manage your IT asset life cycle in a single platform
- Immediately identify key threats to prioritize risk mitigation work with control monitoring assessment
- Demonstrate IT risk and security compliance faster with automated critical IT risk workflows

## Key Features

- Centralized, end-to-end IT risk management
- Unified platform for cross-team collaboration
- IT risk workflow and process automation with pre-configured content
- Risk modeling for multiple use cases or stakeholders
- Ready-to-use visualizations and executive dashboards
- Best-in-class support from industry practitioners

## SCHEDULE A DEMO

\$

### \$3.05M

Difference in the average cost of a data breach at organizations without security automation deployed vs. organizations with automation fully deployed (65% different in average breach cost — between \$3.15M for fully deployed vs. \$6.20M for not deployed).

🔒

### 25%

Of organizations studied have had more than one data breach. 60% of organizations' breaches led to increases in prices passed on to customers.

—

### 74 less days

In organizations with no security AI and automation deployed took an average 235 days to identify and 88 days to contain a breach, for a total lifecycle of 323 days, which was 74 days longer than organizations with fully deployed security AI and automation.
